

To whom it may concern:

I respectfully urge that you reject the National Association of Broadcaster's petition 04-160 aimed at limiting the ability of XM radio to broadcast locally oriented content. As a subscriber to XM radio, I feel that I have the right to listen to a superior alternative to local AM or FM radio stations, and that XM radio has the right to compete with local stations. The arguments of the NAB are baseless and infringe on basic rights of competition in the marketplace.

Thank you.
